## See the latest green gadgets at Stuff Live

YESTERDAY  
It's difficult to be a gadget fanatic and save the planet at the same time. Fortunately for tech-lovers of a greener tinge this year's [Stuff Live Show](#) has the very latest ways to polish your halo.

Vectrix – lean, green, er, motorbike machine

We've got an exclusive first look at the Vectrix-i Bike (pictured), a high-performance zero emission electric scooter for the 21st century. Kitted out with a complete on-board entertainment system, including an iPod dock and wireless Sennheiser speakers built in to the helmet, it's the world's first fully digital audio bike.

Elsewhere you'll find the latest eco-friendly radios from Pure Digital, plus the coolest energy-saving appliance we've seen in the form of DIY Kyoto's Wattson.

So what are you waiting for? [Sign up for Stuff Live](#) today, or jump to our [competition page](#) for a chance to win a Wattson plus tickets to Stuff Live...
